'The spirit of 1776" is the favorite notto of the latter-day reformers, and nuch of the inspiration of the hour is gathered from the frequent declaration of the leaders, that in the people's wrongs of today is a parallel to the grievances of 1776, and so in revolution alone can the wrongs be righted, but the revolution today is to be wrought the revolution today is to be wrought by the ballot and in the campaign the voice of the people will be more powerful than the clash of arms or roar of cannon. The true tocsin is to be sounded, but as a signal alarm to a slumbering people for a great victory to be won, to be all the more triumphant because it is the result of a campaign of education. "Land, transportation and finance" is to be the battle cry from now to next November. Only one man would be uncomplainingly accepted by all, and he is not a member of the party. The great jurist of Indiana remains the popular favorite, and although he is said to have stated that he would not accept the nomination on any platform. Gresham is tonight the candidate of an aggressive faction, which insists that he will accept the nomination if tendered him, and that the success of the party depends on his being named. There is every indication that Gresham's name will be presented to the convention by his admirers and an attempt made to force his nomination in the enthusiasm of the hour. ## THE GRESHAM BOOM

It Comes Up Strong—His Alleged Decli-nations Not Credited OHAHA (Neb.,) July 8.—[By the Associated Press.] The Gresham movement came up tonight seemingly stronger than ever. J. N. Smith, an Illinois delegate, who has just arrived from Chicago, fresh from an interview with Otto Gresham, the Judge's son, brought glad tidings. A meeting of the Illinois delegation was held and after Smith had unfolded his news the delegates scattered about the hotels, trumpeting the ludgels, are now with prices. Judge's name with vigor. T garell of Chicago was one of the most active of the Gresham missionaries. This evening, after the arrival of Smith, Magarell stated that Otto Gresham hai assured Smith that no authorized communications from the People's party leaders had yet reached Judge Gresham, but they would be presented to him today. His wife and son would go over the situation with the Judge, laying before him all the messages. It was declared that the dis-Tributes to the Memory of Col. Polk and Burden. It is patches purporting to have been received from Gresham are inventions. Gen. Weaver was requested to place Gresham's name before the convention tomorrow. He replied that he was a willing and ready spokesman for Gresham, but he had no substantial evidence that the Judge would accept. The Gresham men decided to send a committee of three (Streeter of Illinois, Templeton of Indiana and Orr of Colorado) to find Gresham and obtain from him an expression which would be wired in cipher and laid before the convention. The committee left Omaha this evening.

Geneal Secretary John W. Hayes of the Knights of Labor, and W. Cannon of California, two of the best-known men in the convention, stubbornly declined to accept the Gresham telegrams as definitely settling the question of the Judge's candidacy. Both professed to

to finish on the slightest definite intelligence from him that he would accept the nomination. Added significance is given to the decision from the fact that the delegation constitutes by far the

largest one in the convention.

It is reported that John Devlin, of the general executive board of Knights of Labor, accompanied the committee seeking Gresham. Devlin, it is said, bears a letter from Powderly urging Gresham to secent. A prominent Re-Gresham to accept. A prominent Re-publican, a long-time friend of Gresham, is said to have sent a similar letter.

KYLE AND WEAVER.

Their Respective Partisans Hard at Work OMARA (Neb.,) July 3.—[By the Associated Press.] Caucuses of the various State delegations and individuals were numerous tonight, the most active work being done by opponents of Weaver, who are endeavoring to defeat him. Kyle's friends are claiming late tonight

the following States solid for him:
Tennessee, Kentucky, Virginia, Georgia, Ohio, Massachusetts, New Hampshire, Washington, Colorado and half of Kansas. The efforts to bring in one man against Weaver are causing a large crown of new in one man against weaver are causing a large crop of new names to be suggested for the ticket. With the exception of Kyle, however, no name has been brought forward which has elements of strength and

availability.

It seems likely that Weaver will enter the convention with a larger following than any other man, though efforts to find a match for him in the convention are being pushed with vigor. The mainspring of the objection to Weaver

is his previous greenback record.

At midnight Kyle's supporters are claiming that New York has voted to support the South Dakota man, and his nomination on first ballot is practically assured. The Kansas and Nebraska delegations

met in caucus tonight. Kansas urged Van Wyck for the Presidency with the field in second place. After considera-ble discussion the Nebraskans were persuaded, but one man said Van Wyck had positively declined, so the meeting adjourned till tomorrow, when another meeting will be neld and an effort made to effect a combine against Weaver.

time is not far distant when they will dictate terms to the old political parties of the State. He believed that ere long Bellamy's ideas would take root and be a popular theory.

William Penn Rogers of California declared that most of the people in his State were Socialists and a remarkable reformation had been brought about by a careful study of Bellamy's books.

Pyne of Connecticut saw no other way out of the financial difficulty than to ac-

ideas of Nationalism. Kernachan of Kansas, Brandenthal of Massachusetts and Hobbs of Maine all reported Nationalism increasing. Barnes of Michigan suggested that they carry out Bellamy's ideas by establishing a coöperative laundry in each town. In speaking of the prospects of the People's party he stated that Michigan could be counted on for 75,000 votes.

Their Meeting Winds Up with a Shower Free Silver. OMAHA (Neb.,) July 3.—[By the Associated Press.] The Farnum street The-

believe something wrong with the dispatches to and from Gresham.

The climax of the rejuvenated Gresham boom was the formal action of the Illinois, delegation. They voted solidly to stand by the Judge from start to finish on the slightest desire in the standard of the s well-chosen and pathetic words, the public life and deeds of Col. Polk. A speech, every word of which was marked by solemnity and earnestness, delivered by Mrs. Lease of Kansas, was followed by the most eloquent eulogy of the day, that of Ignatius Donnelly. In closing he said.

In closing he said: A fitting epitaph over the tomb of the de-parted leader would be the lines of the Quaker poet-of New England: "Large-brained, clear-eyed, of such as he

Polk should be protected and a monument erected be protected and a monument erected to his memory on the family farm in North Carolina. The resolution was North Carolina. The resolution was seconded by Ignatius Donnelly and carried by acclamation. Tomocrow the resolution will be formally presented to the convention, and the late Dr. Delameter will probably be included. With meter will probably be included. With the singing of the "Sweet Bye-and-Bye" the gathering dispersed.

## SILVER'S PARTISANS.

They Are Inclined to Unite on Kyle of South Dakots. OMAHA (Neb.,) July 8.—[By the Associated Press. | The silver men today talked the Gresham matter over, but felt that a declination of the nomination would leave the party demoralized. The conclusion was also reached that to present Stewart's name would be un wise. It was decided that the new party must seek for some prominent man in the Northwest who has heretofore been identified with the Republi-

can party. It was given out tonight that the silver men were practically a unit for Senator Kyle of South Dakota. With Gresham out of the race, the situation tonight has shaped itself into Kyle and Field of Virginia on one side for President and Vice-President, and Weaver of Iowa and Terrell of Texas on the other. The withdrawal of Newton of Illinois gave additional strength to the Kyle hoom

Chairman Taubeneck says tonight that the fight is really between Weaver and Kyle, taking the stand that Gresham is out of the race.

Working Women in the Field. OMAHA, July 3 .- A meeting was held in Exposition Hall this afternoon under the auspices of the Working Women's Union Assembly, No. 718, Knights of Labor. It had for its object the estab-lishment of a working women's home in Omaha. T. V. Powderly was to have presided, but being late Susan B. An-thony took the chair. Her address was an appeal for woman suffrage. When Powderly arrived he was greeted with enthusiasm and spoke of the objects of the meeting. A. W. Wright of Canada, a member of the General Executive Board of the Knights of Labor, also people. Gen. Wasner was called unso spoke. Gen. Weaver was called upon to speak, but courteously declined.

The sub-Committee on Resolutions has agreed upon a preamble to the plat-form. It sets forth;

OMAHA (Ncb..) July 3.—[By the Associated Press.] The Farnum street Theater was crowded this afternoon with the People's party single-tax sympathizers. President Brackett of the Omaha Single Tax Club presided, and with him on the stage were a score of well-known followers of Henry George. Hamlin Garland was the first speaker. He prefaced reading "Under the Lion's Paw" by saying that he differed with Henry George in pinning his faith to the People's party and not putting his trust in Democrats.

Mrs. Lease of Kansas carried away the audience in a speech of remarkable eloquence and power.

James Ballinger of Des Moines told what he knew of land monopolies in Ilowa, and Mrs. Kingman told a story from Oregon. Some one in the audience wanted to know where the money came from which published single-tax literature, fand a man in the gallery shouled "From here, it is free silver!" and flung a dollar on the stage. This was followed by a shower of silver from all sides and the meeting adjourned.

to develop without serious efforts to prevent or restrain them. Neither do they now promise us any substantial reform. They have agreed together to ignore in the coming campaign every issue but one. They propose to drown out the cries of a plundered people with the uproar of a sham battle over tariff, so that capitalistic corporations national banks, rings, trusts, watered stocks, demonetization of silver and oppression of usurers may all be lost sight of. They propose to sacrifice our homes, lives and children on the altar of mammon, to destroy the multitude in order to secure corruption funds from millionaires.

Assembled on the anniversary of the birth of the Nation and filled with the spirit of the grand generation which established our independence, we seek to restore the government of the republic to the hands of "the plain people," with which class it originated. We assert our purpose to be identical with the purpose of the National Constitution: "To form a more perfect union, establish justice, insure doinestic tranquility, provide for common defense, promote the general welfare and secure the blessings of liberty for ourselves and posterity." We declare that this republic can only endure as a free government upon the love of the whole people for each other and for the Nation; that it cannot be pinned together by bayonets; that the civil war is over, and every passion and resentment which grew out of it must die with it, and that we must be, in fact as we are in name, one united brotherhood of freemen.

Our country finds itself confronted by conditions for which there is no precedent in the history of the world. Our annual agricultural productions amount to billions of dollars in value, which must within a few weeks or months be exchanged for billions of dollars of commodities consumed in their production. The existing currency supply is wholly inadequate to make this exchange. The results are falling prices, the formation of combines and rings, and the impoverishment of the producing class. While our sympathies as the party of reform are naturally upon the side of every proposition which will tend to make men intelligent, virtuous and temperate, we nevertheless regard these questions. Important as they are, as subordinate to the great issues now pressing for solution, and upon which not only individual prosperity, but the very existence of free institutions depend, and we ask all men to first help us determine whether we are to have a republic to administer before we differ as to the conditions upon which it is to be administered; believing that the forces of reform this day set in motion will never cease to move forward until every wrong is remedied and equal privileges securely established for all men and women. Third—We believe the time has come when railroad corporations must either own the people or the people own the corporations, and should the Government enter upon the work of owning and managing any or all railroads we should favor an amendment to the Constitution that all employes upon such roads shall for the time being forego the exercise of their right of suffrage in accordance with the precedent established by the Constitution as to the inhabitants of the District of Columbia.

The platform will demand a constitution.

A Cyclone's Havoc in a Pennsylvaniu
Town.

BETHLEHEM (Pa.,) July 3.—[By the Associated Press.] A terrific cyclone struck this town this afternoon. The main building of the Bethlehem Fair and Driving Park Association was totally destroyed. The loss is \$50,000. Lightning struck the cable wire of the telephone company and set the postoffice building, in which it was situated, on fire. The flames were extinguished without great damage. Sawtelle's bottling establishment was completely ruined; loss, \$30,000. Many trees were uprooted. Electric light, telephone and telegraph wires were blown down, as was the steeple of the First-Presbyterian Church. Considerable damage was done to crops. The total loss about town is estimated at \$150,000.

Easton (Pa..) July 3.—This afternoon a terrific windstorm, accompanied by thunder and lightning and a perfect del-uge of rain, broke upon the city. The wind blew down the new Moravian Church, partially finished, leaving only the foundation standing. The Easton and Southeaston foot suspension bridge was severely strained. McMinnville (Or.,) July 3 .- [By the Associated Press.] Wilson, the mur-derer of Mamie Walsh, escaped from Sheriff Kelly and Deputy Sheriff Morgan last night at 11 o'clock as they were conveying him from this place to Salem, in a carriage. The officers learned before leaving here that Wilson was recognized here, so they were fear-ful lest the mob should come upon them at any time. When passing through a dense forest they saw what they sup-posed to be a squad of men. The driver, who was on the front seat with Sheriff Kelly, said: "Look out!" At the same time he felt the arm of the prisoner strike his shoulder as he leaped from

Wilson bounded over a fence and buried himself in the forest. Deputy Morgan sprang after him and followed him into the thicket, but he soon lost trace of the fugitive. By trace of the fugitive. By sunfise a party of men were scouring the woods in every direction. The prisoner was not ironed in any way. Sheriff Kelly thinks Wilson will kill himself, as he has attempted suicide twice since his arrest.

A rumor is now current here that he has been caught, but it is not authentic.

THE SAN JOSE FIRE.

Losses Nearly \$500,000-Plans for Re-

building the Burnt District. SAN Josz, July 3.—[By the Associated Press.] The scene of last night's fire was visited by thousands of people today. With daylight came people from all parts of the city and surrounding country to see the great work of destruction, and all day long crowds of of water were kept on the burning ruins and débris until late this after noon. A large amount of goods were aved from stores, and thieves carried much valuable stuff away before the officers could place lines of rope around the piles of goods and station themselves so as to watch them. It is impossible to estimate the value of the property saved, but it is certain the loss will be nearly \$500. 000, the figures given amounting to a total of \$483,200, with a number of small losses which cannot be ascer-

tained. The Lick House Block, constituting the best portion of First street will, as soon as possible, be replaced by a hand-some three-story structure by C. T. Ryland, the owner. James Phelan will build a handsome structure on San Fernando and second streets in piace of the old frame buildings burned, C. J. Martin will not replace the California Theater, but will probably erect a busi-ness block ins.ead. L. Krumb will re-build on Second street. Bullsli et al. build on Second street. corner of Third and San Fernando has not decided as to his plans, but all the structures will be replaced by better ones, and in a short time the devas-tated portion will present a much bet-ter appearance than before the fire.

Pilcher's Death Due to Poison

of the stomach of William Pilcher, the yesterday after being arrested on a charge of forgery, were analyzed today. Traces of cyanide of potassium were found, showing that Pilcher had con-mitted suicide, as he had threatened to do if he were ever arrested.

San Francisco, July 3.—Edward Herbert, a young wood-turner, committed suicide in a horrible manner here this atternoon, blowing his brains out in his own room. Nothing was known of the deed for several hours, when the body was discovered by the landlady, The indications were that Herbert had loaded the gun and discharged it by holding it over a tallow candle while standing up. afternoon, blowing his brains out in his

Still Wrangling Over It.

NEW YORK, July 8.—At the monthly meeting of Typographical Union No. 6 President Kennedy read the report of the committee at Minneapolis, and in-sisted that he and his fellow-members acted for the best interests of the Union. After a long debate the whole matter was referred back to the com-mittee with power to act. COPIES IN JUNE!

AN IRISH-CHINAMAN.

An Ethnological Novelty Who Interests Georgians, [Augusta (Ga.) Herald.]

Augusta now has several novelties in the way of Chinamen. Living on the corner of McIntosh and Calhoun streets is an Irish-Chinaman. He is decidedly the most intelligent Chinaman in the city. He speaks and writes very good Eng.ish. A reporter called upon him yesterday and after much persuasion succeeded in getting his history. He has been in Augusta only a short while. and is doing a grocery business at the place mentioned. He came here from Beaufort, S. C. He says he left China when a boy and went to Ireland, where

National League baseball. Only one thing kept those who appreciate good ball from standing on their feet, throwing

up their hats and shouting themselves oarse, and that was the fact that the home team was holding onto the short end of the string all the way through. The game itself was a real "hum-mer," a royal battle between two clubs made up of well-matched giants. It was one of those scientific, machinelike exhibitions that has charmed hundreds and thousands of people all over the country with the national pastime. However, as a machine-like exhibition the comparison must be said to end with the perfection of play by the members of the two clubs. It cannot he said that each player had a place in the "machine." because every indithe "machine," because every indi-vidual, without a single exception, went he "machine," after everything in sight regardless of all consequences but the chance to re-tire a man. Nothing was shirked by anybody, and time after time impossi-bilities were turned into assists which almost took the breath away from the

almost took the breath away from the spectators as they saw runners retired after lining out what seemed safe shots. Nicholas Lookabaugh, who appears to get more and more effective, the harder he is worked, again went into the box for the Duke and pitched his first victory of the week. He did not pitch for strikeouts, but floated the ball across the plate and trusted to the men behind him. He fielded his position well and watched the bases like a hawk, keeping the runners close to the cushions. Under ordinary circumstances, and with the runners close to the cushions. Many a time the ball was shot at Buckram with a the ball was shot at Buckram with a force that would have carried a medium-sized German off his feet. On other occasions he would sprint half way across the field, block an apparently safe hit and retire his man. only because he had fewer opportunities to distinguish himself. He covered more ground than Ebright, and gracefully took in everything in sight. He completed the front end of a play which would have been the sensation o the season when he ran across into right field and blocked Clark's hit with his left hand, picked it up with his right, swung around and let drive at old "Pop." Neither the old gentleman nor any one else expected Glenalvin to get within reach of the ball, hence the runner was not retired only because McCauley was fielding his position in-stead of waiting on the base for the

The Angels lost the game through sheer hard luck. By this statement it is not desired to detract anything from the victors, who are entitled to the credit. But it is a fact that Lookabaugh was hit much harder than Roach, but it is a fact that the content of but time after time the ball from a Los Angeles bat fell into some one's pocket or else was gathered in the phenomenal, unprecedented fielding. No less than three times an opportunity was presented to tie the score, but the single safe hit needed was not forthcoming, although the ball was hit hard in ever instance. The only doubtful hits of the game were made by the visitors. One was a bounder toward third by Denny, which nearly every one but McDonald thought was a foul. Hulen fielded it, out the runner reached first just as the ball struck McCauley's feet. Another was a "fungo" by "Happy Joseph," which dropped just back of first base almost into McCauley's hands.

The Angels set the fielding pace in the first inning when the Dukes were held down to two runs on four hits—a double by McGucken, and singles by Ebright, Dooley and Denny, and a passed ball.

Two more were added in the fifth.

dispatch from Washington, or date of July 1, is of interest:

The Department of Agriculture has issued a bulletin giving the result of experiments with the sugar beet in 1891. Eight samples were received from California. The average size of the beets was entirely too large, being forty-eight ounces. The average percentage of sugar in the various samples was 11.06. The highest percentage of sugar was 13.35 with a beet weighing twenty-three ounces and the lowest was 8.35 in a beet weighing sixty-two ounces. The average yield to the acre as reported was 14.2 tons, showing a theoretical yield of sugar of 2188 pounds.

Thirty-five samples were received from Oregon containing an average weight of twenty-three ounces. Samples were received from Jackson county showing 17.99 per cent. of sugar with a weight of twenty-three ounces. Samples were received from Jackson county showing 17.99 per cent. of sugar with a weight of twenty-ounces. "The samples from Oregon are," the report says, "uniformly rich in quality, and if they truly represent the capabilities of the State there certainly is a bright future for the beet-sugar industry in that portion of the Pacific Coast.

Eleven samples were received from Washington, from six countles. The average percentage of sugar in the beets was 14.47 and the average weight eighteen ounces. The richest samples, two in number, were from Stevens county, showing an average of 17.51 per cent. of sugar and averaging in weight only ten ounces. With the exception of two, all the samples received from Nevada from three counties, of which one—Washoe—furnished fifteen. The average percentage of sugar in a beet for the State was 17.02, and the average weight of the beets was eleven ounces. Only two samples were received from Arlzona. They were both very much overgrown, being about three times as large as the normal beet should be. As would be expected, the percentage of sugar was very low, the average of the two samples being 7.69 per cent. The Department of Agriculture has issued

The witness on the stand had been bully-ragged by the lawyer until his patience was exhausted.

"Now," said the attorney, "you say you saw the prisoner draw the pistol?"

"Yes."

"Remember you are on your oath."
"I'm not forgetting it."
"You are sure you are telling the truth?"

"Sure."
"No mistake about it?"
"None."

"You couldn't be persuaded to make my other statement?" any other statement?

Here the judge interposed.

"Oh, let him go on, your honor,"
pleaded the witness, "he's a lawyer

The Same Special Counsel Acting for the Balmaceda Government and for the United States—Dispatches.

The following important dispatch was sent from here on June 80 at the request of the St. Louis Republic by

Col. Blanton Duncan: "Los Angeles, June 30, 1892.
"The St. Louis Republic—Answering
your request I am informed by the best authority that Gen. J. W. Foster was not only the paid attorney of Balmaceda's minister, but that he was also the attorney for Spain, Mexico, China and other governments, his pay said to aggregate \$60,000 per annum.

Judge Brunson, an eminent lawyer here, makes no concealment that he was employed by the Balmacedan govern-ment, prior to his appointment at the instance of Foster to be special United States attorney, and that, as such as was under the direction of Foster. (Signed.) JOHN W. FOSTER,
Counsel Chilean Legation.
The next day dispatch No. 2 went forward from the chief Balmacedan attorney to his subordinate, showing that Foster not only ordered the seizure of the Itata, with the consent of Miller, but that he placed the United States Government in a position of a base violator of international law; threw its great power into the scale against a weak, struggling people, striving for

this office, if notice is given. Please have the matter attended to.

Very respectfully,
(Signed)
JOHN B. CATTON,
Acting Attorney-General.
P. S.—The Attorney-General dictated
this letter just as he was about leaving
the city, and it will be signed by the
acting Attorney-General. No. 5.

Hon. John W. Foster—Dear Sir: I today received copies of the libel in the Itata case, the libel against the arms, the libel of Trumbull, and copies of letters, of all of which I have had additional typewritten copies made so that those which you send me can be re-turned at the earliest practicable dates. Meantime there is one matter about which I think I ought to about which I think I ought to call your attention, namely, so far as the arms case and the Itata case are concerned, it will be im-possible for the District Attoruey to compel the attendance within the South-ern District of California of any of the witnesses from the East. In the crimi-nal cases against Trumbull et al., their nal cases against Trumbull et al., their attendance can be compelled and a subpena will have to be observed by the parties on whom it is served. But even those present under such a subpena can still fall back on their privilges and refuse to testify in the civil cases, so their testimony therefore in the two cases in view, it would be necessary that it should be taken de bene esse here, the witnesses being more than 100 miles from the place in which the cause is to be tried.

Ui der these circumstances some steps should be taken at once by the Attorney-General or his representatives in the Southern District to take the testimony here of the witnesses, Reynolds, Fowlers, et al., and take the testimony in San Francisco and Oakland of the witnesses there resident whose names you have on the memorandum of evi-dence sent you, and which you forwarded to the Attorney-General.

The arms case, as I understood the

matter after our last conference, is the case which should be tried first. I have no doubt myself of the desirability of this. That case should be followed by the criminal actions against Trumbul and others. But the arms case cannot and others. But the arms case cannot be tried with any hopes of success, or certainly cannot be tried completely and in such a way as to give a practical grarantee of success without the testimate of the success without the success. and in such a way as to give a practical guarantee of success without the testi-mony from the parties here as to the original purchase of these goods, their shipment, destination and the objects for which they were bought; and this testimony can only be had by taking it de bene esse in New York and in San Franbene esse in New York and in San Fran-cisco. In order to have it in time it should be taken at once. Hence my writing you about it now, as I consider the matter very urgent. So far as the Trumbull case is concerned the witnesses cannot only be taken West, but they must be taken there, it being impossible, as I understand it, to take their testimony de bene esse in a case where the prisoner has a right to be confronted by the witness.

We should not fall into the mistake,

however, of relying upon their assent to testify in the civil cases because they find themselves within the jurisdiction under a subpoma in a criminal case, in-assnuch as without their assent their testimony cannot be taken.

The Examiner shows Foster's connection with American claims.

'The Spanish Minister finally announced that the amount agreed upon would not be paid unless the United States paid a large Spanish claim represented by John W. Foster. In consequence of this, it was said that Secretary Bayard refused to hold any comretary Bayard refused to hold any com-munication with Foster, either verbal or written, during the rest of his term."
This statement had the widest pub-licity last year in Washington. The

Examiner also gives Foster's course as attorney for China, and his attacks in attorney for China, and his attacks in China's behalf against our exclusion laws. He will be a nice man to answer Chinese legation protests when they present his own arguments.

not surprising that people who come her in winter from the frozen East and North in winter from the frozen East and Northwest fall in love with the place, and that
many of them return here to reside. It
would be difficult to imagine a city that approaches pearer to an ideal place of residence. Nature has done her share and art
has compelled what little was lacking.
Here the jaded man of wealth can rest from
the pursuit of the almignty dollar and enjoy a country in town, with all the joys of
quiet country life, while not more than fifteen minutes ride by electric car from
opera, lodge and office, and the poor man
can sit under his vine and fig tree, surrounded by fragrant blossoms that would
tax the purse of the well-to-do, at that season, in the Fast. We must, however, close
this letter, or you will think that I have
caught the "California fever,"

Smashed the Window. Last night about 10 o'clock some one threw a large boulder through the window of Mrs. Ferner's pawnshop, on Main street. There is a quantity of confederate money displayed in the win-dow, and it is thought that when the man discovered what the stuff was, he was so disgusted that he left without taking anything. Nothing in the win-dow was disturbed. There were a number of persons in the vicinity, but no one saw the rock thrown.

Stole His Shoes. of Thomas Clark, went to sleep in the rear of Mackel's saloon on First street, when some one stole the shoes from his feet. The patrol wagon was sent for and Clark taken to the police station, where he claimed to have been robbed of \$35. The officers do not believe that Clark had any money, but as he could not celebrate barefooted he was booked for lodging.

ABOVE THE CLOUDS.

Fresh Attempt to Climb Mt. St. Ellas to be Made Soon. [San Francisco Call.] Two United States Coast and Geo-

letic Survey men. McGrath and Turner by name, are at present at Yakutat Bay, east of Mt. St. Elias, and propose camping there with their party until the Alaskan winter drives them out. They expect to bring back with them some specific information as to the height of Mt. St. Elias, which has never

yet been scaled by man.

The mountain is wrapped in a perpet-ual mantel of cloud and snow, and by reason of its glaciers and avalanches is

reason of its glaciers and avalanches is very difficult to ascend. Three-quarters of its height was climbed last summer by Prof. Israel Russell, who now figures that its summit is 18,000 feet above sea level.

The generally accepted measurement is 19,500 feet, as reported by Capt. Dall, of the Coast Survey. Malespina, the old Dutch navigator, made it 17,854 feet; Tebenkoff, with his Russian method, figured it 16,938; La Parouse, with fine French calculation, Parouse, with fine French calculation, called it 12,661, and two British navy men made it 14,970 and 17,854, respectively. As there is a discrepance of about a mile and a half in the calcu lation of these observers there is room for something more definite, and Turner and McGrath have hopes of furnishing it.

Hot Weather and Longevity. [St. Louis Globe-Democrat.] "It is commonly supposed that peo-

ple live to a greater age in cold than in warm climates, but that, like many warm climates, but that, like many other generally received opinions, is an error," said E. T. Sampson, a Philadelphian, who has visited many lends and is making his temporary home at the Lindell. "Population considered, semitropical Japan heads the list for centenarians. The Southern States can have as many people in proportion to show as many people in proportion population, who have passed the thre population, who have passed the three-score-and-ten mile-post, as can those of New England. The oldest man I ever saw had lived all his life in Southern Arizona. He was what is popularly known as a greaser—one-third Spaniard, one-third Indian and the remainder coyote. even the purest drinking water is. The very best water known is full of germs. They are the most prolific creatures of which we have any knowledge, for a single one may be the causative parent of more than sixteen million five hundred thousand descendants in a day. They are also possessed of great vitality, for they can be carried great distances in water without losing their power of producing disease. They can be frozen or even boiled without being destroyed. They may be kept dried for years and yet when placed in a suitable medium will come to life and produce fermentation and decay. They are also producing disease, and yet when placed in a suitable medium will come to life and produce fermentation and decay. They are that you say, "what can be done to avoid them since they cannot be killed by boiling?" There is but one thing which will effectually destroy them and that is coming in contact with spirits. A small amount of pure spirits in the water will effectually kill them and destroy their evil effects, but it should be borne in mind that nothing but the purest and best spirits should be used for this purpose, and that nothing is equal to whiskey. Not the ordinary whiskeys are above them—contines but some city indorsed by the scientific world. Such a whiskey is Duffy's Pure Malt, which is, today, more popular than ever before in its history, and which is doing wonders to destroy the germs of every disease. There are hundreds of families that use it constantly in connection with their drinking water. both at the table and between meals. Beware of any drugglist or grocer who seeks to offer you something he says is "just as good." Duffy's is the only pure medicinal whiskey upon the market.

THOSE STREET BONDS.

Their Legality is to Be Tested in the Courts.

Holders by Those Holding Them and the City Treasurer Instructed to Enforce Law.

The City Council will meet at 10 o'clock this morning, but will transact no business and adjourn until the same hour tomorrow, when the regular proseedings will go on.

t is probable that the most impor-tant matter to come up will be a discus-sion of the street-improvement bond law, growing out of an incident that took place Saturday, and which is liable to put a stop to all street improve-ment under this law until its validity is ment under this law until its validity is tested in the courts. On Saturday the first installment of interest on the Eighteenth and Twenty-eighth street bonds, the first streets improved under the law, fell due. As near as can be ascertained, no notice had been served ascertained, no notice had been served by the holders of the bonds on the prop-erty-owners, and in consequence but few of them paid their interest. No effort was made by the contractors, or the holders of the bonds, to collect the interest, but on the contrary, City Treasurer Johnson was at once served with a notice to enforce the law, which provides that in case of the interest be-coming delinquent, he shall at once de-clare the bonds due and payable, and proceed forthwith to sell the property proceed forthwith to sell the property to meet them. To say that the interested property-owners are indignant over the matter is putting it mildly. It is claimed that this action is taken by the contractors for the purpose of getting a "cinch" on the property-holders, for the reason that they have been unable to place the bonds satisfactorily, and it is being done to force cash payments to prevent a cloud being cast on the titles. Several of those caught napping have taken legal advice, and they say they intend now to fight the legality of the bonds in the courts. At any rate they say they do not propose any rate they say they do not propose to allow the contractors to run a bluf, and they will now ascertain just where they stand before the law, and take steps accordingly. The whole question is a new one, and as it is of great importance to the city at large, it will doubtless go to the court of last resort for final settlement.

As THERE is more or less talk about the chances of the Presidential election being thrown into the House of Representatives, and there is much interest as to the manner of conducting such an election, we may make the matter clear and at the same time answer several in quiries by quoting from art, xii of the Constitution of the United States as

follows:
. and if no person have such majority [of the electoral college] then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President the House of Representations. voted for as President the House of Representatives shall choose immediately, be ballot, the President. But in choosing the President, votes shall be taken by State the representation from each State havin one vote; a quorum for this purpose shall consist of a member or members from two thirds of the States, and a majority of all the States shall be necessary to a choice

In other words, the unit rule prevails and each State casts one vote, to be determined by a majority of its representation in the House. It would be the present House which would do the

In Fresno county the World's Fair Association is now engaged in putting up fruits in jars, 300 of which were received by the association a few days since. A number of the finest vineyards in Fresno county are owned and managed by women. The Auxiliary has decided to have manufactured a county badge, the sale of which is expected to return considerable revenue for World's Fair work

Gross earnings of seventy-seven roads for the second week of June Increased nearly the second week of June increased nearly 8% per cent. over the corresponding period a year ago, and roads that have thus far reported for the third week show an even larger increase—St. Paul, for instance, gaining \$124,614.

Another thing that encourages holders of securities to hope for a rise is the fact that the July disbursements for dividends and interest are expected to amount to \$20.

the July disbursements for dividends and interest are expected to amount to \$90.000.000 in this city, \$10.000.000 in Philadelphia, \$15.000.000 in Boston, and about \$200.000.000 for the whole country. A considerable portion of this vast sum will, of course, go into the hands of wealthy people, who are expected to reinvest it in securities, rather than keep it of deposit at the present beggarly rates of interest. There is already considerable inquiry for bonds, in anticipation of this demand, and it is reported that the new elevated railway of Chicage has sold \$9.000.000 of 5 per cent, bonds in this city at 90.

Some Queer Proceedings Exposed We publish today the text of special dispatches sent from Los Angeles to the St. Louis Republic which seems to put Mr. Foster, the Secretary of State, in an equivocal attitude. They represent him as the accredited agent of the Balmaceda government during the late Chilean unpleasantness, issuing orders to a special attorney and directing him to detain the Itata by legal proceedings, even though the proceedings should eventually be found faulty and the vessel be released (which actually proved to be the case.) It appears that Judge Brunson of this city was suggested by Atty.-Gen. Miller as a proper and efficient attorney, and John W. Foster, "counsel of the Chilean legation," immediately employed him. Afterward the same attorney was employed by the Attorney-General's office as special counsel for the Government. Judge Brunson seems to have received instructions from both the Chilean counsel and the Attorney-General's office, which, to state the case mildly looks "queer."

That there was a complete under standing between Counsel Foster and the Attorney-General's office is attested by the fact that Mr. Foster assumes to speak by authority, saying "the Attorney-General will not object,"

It is stated that Mr. Foster acted not mly as counsel for the Balmaceda Legation, but that he was also the attorney for Spain, Mexico, China and other foreign nations in prosecuting claims against the United States, his pay aggregating not less than \$60,000 a year. The correspondent properly inquires whether an attorney so lately in the service of foreign powers is the proper person to represent the United States in future relations with his former clients and

Unless we miscalculate greatly, the publication of this correspondence will make a decided stir in Government circles and will lead to an inquiry by Congress.

The Ten-years' Bond Plan.

The ten-years' improvement bond The ten-years' improvement bond scheme, adopted by the last Legislature and from which much was expected in imposing any fatality or necessity on nigns. A member of the association and from which much was expected in the line of municipal improvements is in a bad way. The improvements already accomplished in this city under the new law have resulted in a deadlock, and the indications are that either the property-owners or the contractors are to be "cinched"-probably the latter.

It was found that, after the work had some long-time paper on their hands and a shortage of working capital. Eastern capitalists declined to buy the bonds, alleging as a reason that they would have to be sent back here twice a year to have the interest payments

Another reason, kept in the back ground, was a feeling of uncertainty as regards the validity of the bonds. represent a new scheme, which has never stood the test of the courts, and some of the best lawvers expressed a doubt whether they would "hold water" if thus tested. It is stated that the improvement law fails to conform in one important particular with the con stitutional provision governing bonded indebtedness, and, therefore, the whole would fall to the ground as unconstitutional if put to the test.

The bonds issued on two of the street first to be improved according to the new plan-Eighteenth and Twentyeighth streets-have now reached a point where they will undoubtedly be obliged to "walk the plank." The first installment of interest fell due July 1. According to the provisions of the law if the installment of interest was not paid on that date, the whole amount of the bonds became due and payable. As notices were not sent to the individual property-owners, many of them were not posted on the requirements of the situation, and the consequence was that paid their interest on or before the rescribed date. Some who presented themselves at the City Treasurer's office on the 2d of July were informed by that official that he had received written notice from the bondholders requiring him to declare the interest

manding that he proceed to advertise and sell the property. This is generally regarded by the taxpayers as a snap game of the most flag- | ber sleeve.

linquent,"the bonds payable and de

rant sort. 'Had the bonds been placed indoubtedly a reasonable grace would have been allowed to the property-owners to pay their interest. But, as the contractors found themselves in a hole with the bonds, they concluded to try and shift places with the property-own ers, leaving them in the hole instead It is a heroic expedient, and probable means war. The property-owners are advised that they have an excellent case and can probably defeat the bonds alto-As the bondholders have de cided to appeal to Cæsar, they will have to take Cæsar's judgment upon it. If it had not been for this snap game proba bly the bonds would never have been contested.

Meanwhile it is not likely that any more street improvements will be undertaken under the ten-year bond plan until the constitutionality of the law is fully determined. This, if the matter is strongly contested and appealed to the Supreme Court, may require a year While the merry war goes on the bond scheme will be "hung up."

A GENTLEMAN recently returned from an extended trip through the East reports that he saw no city of equal population which presents more evidences of business activity and prosperity than Los Angeles. Everywhere he found the keenest interest in Southern California. and he believes there will be a great migration of well-to-do people in this direction as soon as times improve so that there is a chance to sell their prop erty. The fact is that Los Angeles is in better "heart" and possesses more of the elements of a rapid advance than almost any Eastern city of this size. We have been getting a good ready for several years and we are now approaching a new era of phenomena development.

JEWS IN FRANCE.

Their Status as Revealed by the De Mores-Mayer Duel. The New York Courier Des Etats Unis June 25 publishes the following editorial on the Mayer-De Mores duel in rance, which tells what led up to that fatal event:

Paris Prince D'Aurec, a comedy of the times, in which the author, Herr Lavedan, has drawn the character of a

Lavedan, has drawn the character of a Jew. Baron De Horn, who plays an odious rôle. Jules Lemaitre, describing the first presentation of this play in the Journal Des Debuts, wrote thus: "I need not say to you that I personally have not the slightest prejudice against the Israelites. They are an extraordinary race, whose history is the most beautiful and the most tragic in the world, and they were at their origin an extremely noble race, a pastoral peoan extremely noble race, a pastoral peo-ple and warlike. Just like the exile whose misfortunes have made him a Pole, the Israelite can say, It is our Pole, the Israelite can say, 'It is our misfortunes that have made us Jews' in the popular and worse sense of the centuries word. During eighteen centuries Christian Europe has forced them to be preëminent in the interchange of money; however, this was not their fault. Therefore I do not dislike them in the least. We owe our God to them and their women are often marvels. grace and of wit-and I am grateful that they are. There are Jews who are, and besides there are some who are not yet, millionaires. It is a race too, in musicians, in authors of vaude villes, in comedians, in writers of the results, in comedians, in writers of the pessimistic school and in neurologists. They have come to love France as we love her, entirely as we love her—and so much the better—for—French—blood, which, let us not forget, is an incredible mixture of all bloods. ole mixture of all bloods.

The writer in the Debats, the Courier goes on to say. has perfectly outlined in these few words the sentiments of the great majority of the Christian French men toward French Israelites. We demand that they should love France like a true Frenchman. If they fill this con-dition, if they attest their devotion to the common country by serving in the French army, what Frenchman worthy of the name will dream of approaching them with their Semitic origin? But there are Frenchmen and Frenchmen as is proven by the unfortunate affair which today interests two worlds. A severe thrust given by the Marquis de Mores, the ex-cattle-raiser of Mon-

tana, who has become an Anarchist and an anti-Semite, to an Israelitish officer of the French army, has caused the death of the latter, and at once the nat-ural sensation caused by this death calls ural sensation caused by this death calls attention to the Jewish question. Al-ready people ask whether there will be n France, as in England and in Russia. crusade against the Jews, if the More duel is only an incident and from which people hurry to draw conclusions unfa-worable to French manners.

In reality this pretended crusade does not exist, but it has found some indi viduals of more or less spoiled reputaviduals of more of less spoiled reputa-tions to create a false agitation in the press and at public meetings. The Marquis de Mores is one of the evil leaders of the agitation of which the organ is the Libre Parole, Edward Drumant's journal. People know the scant worth of this M. de Mores, au ex-officer who has resigned, an ex-colonist in America, an ex-Boulangist orator, then an ex-Anarchist, and at last an anti-Semite. He is one of those aristocrats who have wandered from the path, one of the red marquises, as we used to say, who are more ridiculous than dangerous. No one takes him seriously, but he makes a noise and that suffices for his glory.

his glory.

Several weeks ago the Libre Parole, having published an article in which it attacked the Graelete officers in the French army, one of these, Cremien Foa, captain of the Eighth Dragoons,

addressed M. Drumant this letter:
"Monsieur: The two articles which appeared in your paper of May 23 and 24 under the title, "Jews in the Army," army who believe in the Jewish faith you have insulted me personally. I bid you cease this odious attack, and I give you notice that if you do not take my letter in consideration I will demand of you reparation by arms.

"CREMIEN FOA,

You are not the oldest, and you have not been delegated by them. I add this word, if the Jewish officers of the army are wounded by our articles let them choose from the number they wish to delegate, and we will oppose to them an equal and we will oppose to them an equal number of French swords. As for you,

Following this letter M. Cremien Foa sent his witnesses, MM. De Perussi and De Vandel, captains of the Chasseurs, a cheval to M. Drumont, who on his side appointed a witnesse. Chasseurs, a cheval to M. Drumont, who, on his side, appointed as witnesses M. De Bremendaars and the Marquis de Mores. The duel was fought and M. Drumont was wounded in the face, but the affair was to have other consequences. Capt. Mayer, a professor in the Polytechnic school, resented in his turn the article in the Libre Purole and that resulted in another duel. and that resulted in another duel, which ended in the death of Capt. Mayer and the robbing of the French army of an officer who had a future before him. As between the useless Marquis de Mores and a good servant of France blind fate unhappily chose

The arrest of the Marquis de Mores is announced. The legal prosecution will not be based, as one might suppose, on a law forbidding dueling. Such a law does not exist in France. But there is an article, No. 309, for the Penal Code which punishes with from two to five pars. years' imprisonment every one who voluntarily has inflicted wounds or given blows. The same article adds:
"If the wounds or the blows inflicted voluntarily but without the intention to kill nevertheless produced death the quitive one shall be unvisibled by impris-

guilty one shall be punished by impris-onment at hard labor. It is because of onment at hard labor. It is because of this article that the Marquis de Mores will appear before the Court of Assizes of the Seine. Why the Denver News Throws Clevelar

The Denver News, the leading Demo cratic paper of the Rocky Mountain States, has declined to support Mr. Cleveland. In the following editorial

"The opposition of the News to Mr. Cleveland does not arise out of any question as to his ability or character.
That he is a splendid type of the selfmade, vigorous American is conceded.
That he is aggressive and tenacious to
secure success for all public measures
upon which he has convictions is the
verdict of the public and were it not verdict of the public; and were it not that a matter of principle—one vital to the American people, and the prosper-ity of the State, interfered the News would accept his nomination and hail his election as a splendid benificence to "The money problem is by far the

most important one that remains unset-tled. As compared to tariff—so far as the result of the ultimate rightful soluion of either is concerned, that of money and its coinage is as the great light and heat-giving sun to the small est of the stars that stud the midnigh heavens. Tariff is a mere matter of schedules. Both parties admit duties must be levied, and the only question is upon what and at what rate shall they be imposed. The question of protec-tion, incidental ordirect, of American industries, is also a question of degree, for both parties have, at least until the recent Democratic convention, admitted that it should exist, and in legislation have acted along these lines. But the have acted along these lines. But the question of money is before tariff. It is of higher importance, and lies at the very foundation of the whole problem of the country's prosperity. If money is sound and abundant, business is active. tive, employment plenty, enterprise accelerated and fair returns received for all of labor's products. If it is scarce, however sound, the opposite conditions exist, and depression and gloom appear on every hand.
"Mr. Cleveland and Mr. Harrison-

coinage.
"The platforms upon which they were

"The platforms upon which they were nominated impose no moral obligations upon either to sign a free coinage bill, therefore, we know neither will do so—even should Congress pass one.

"This being the incontestable truth the News, guided in all things by its convictions, cannot support the candidacy of either. The News has the course of its convictions and will not best age of its convictions and will not hesi tate to maintain it. Whatever Presi dential candidate it advocates must be pledged to approve a free coinage bill. For it to do otherwise would be to cheat the people, and this it will not be guilty of.

## AT THE CHURCHES.

Patriotic Decorations at the Church of the Unity.

An Eloquent Sermon by the Pastor, Rev. Dr. Thomson.

Bishop Haygood at Trinity M. E. Church, South.

Presiding Elder Bresee at Simpson Tab -At the First Methodist and Immanuel Presbyterian Churches-Notes.

In observance of the patriotic celebration to be held today the Church of the Unity was yesterday tastefully dec-orated with appropriate floral emblems. On the platform behind Dr. Thomson's On the platform behind Dr. Thomson's desk was an American flag entirely made out of red, white and blue flowers, while the motto, "God bless our native land," in natural flowers, was stretched the full length of the organ loft. The remainder of the floral display was in keeping with the principal designs. The service was eminently patriotic with its appropriate hymns and the sermon of the pastor upon "Christ in American Life" was a stirring address upon the conditions, fluties and responsibilities of citizenship. Taking his text from Joshua, "Now, therefore, put away the strange gods which are among you and incline your heart unto the Lord God of Israel." Dr. Thomson described in detail the "strange gods," both of home manufacture and of the imported kind, as well as those that were found here on our original settlement, with which the American people has had to deal, oftentimes to its own hurt and injury and always to its great disturbance. The three several social problems presented in the presence of the alien Chinese, the indigenous Indian and the migratory colored man were to the search of the pastor upon the conditions. Taking his text from Joshua, "Now, therefore, put away the strange gods which are among you and incline your heart unto the Lord God of Israel." Dr. Thomson described in detail the "strange gods," both of home manufacture and of the imported kind, as well as those that were found here on our original settlement, with which the American people has had to deal, oftentimes to its own hurt and injury and always to its great disturbance. The three several social problems presented in the presence of the alien Chinese, the indigenous Indian and the migratory colored man were successively handled with that breadth of treatment and keen insight that are characteristic of the speaker. Passing to the subject of immigration, Dr. Thomson considered that the admission to this country of the insane, the paupers the criminals in fact the social to this country of the insane, the pau-pers, the criminals, in fact the social refuse of the old world, should be pro-hibited, the countries that produce such people should keep them. Let us invite those of our own blood. There is some-

those of our own blood. There is something in the European constitution that is self raising. Other countries cannot get along without some admixture.

The imported "gods," the Anarchist and the boycotter, were then dealt with in trenchant style, the speaker's remarks upon the cowardly methods of the boycott in commercial as well as in marks upon the cowardly methods of the boycott in commercial as well as in religious matters eliciting warm applause. The dangers of paternalism, as a development of the governing idea and as applied to a free people, were pointed out and followed by a strong plea for individuality. Plutocracy, as one of the strange gods came next in order. People with wealth should spend it. The endowment of an institution with possible legal complications afterward was not so good a way as for a man to administer his estate in his difetime. Chief among the "home-made" gods is the boodler, eating out the honesty and trustfulness of the nation, the parasite, the scale-bug upon society whose depredations use up four-fifths of the money raised by direct and indirect taxation for public purposes. The man that sells his vote for a dollar is a disgrace to manhood. As for manhood suffrage it is a fine thing when you have the manhord, but the time will come when the rising generation will have to show qualifications and visible means of support to be entitled to vote. After touching upon the evils of class legisla-

when the rising generation will have to show qualifications and visible means of support to be entitled to vote. After touching upon the evils of class legislation the speaker said of the public schools that they were the only institution that proposes to make citizens for the republic. He believed in compulsory education so far as the grammar school was concerned. Politics should be strenuously kept out of the management of the schools and the very shadow of a man that wanted to twist things in that direction should be thrown out. Favoritism should have no hold and the only test for service should be fitness. If the teacher were a Christian Scientist or a Catholic the fact should have no weight against her, unless she attempted to introduce the teachings of these doctrines to influence in any way the minds of her pupils, in which case she should be discharged. All sectarian influences without distinction should be kept out of the public schools.

kept out of the public schools.

Dr. Thomson closed with an eloquent peroration upon the future of California and of Los Angeles in particular, pic-turing its probable future in glowing words and appealing to the Christian sentiment of the people to make the country worthy of its Lord and master. SIMPSON METHODIST CHURCH.

Rev. Dr. Bresee, presiding elder of Los Angeles district, preached at Simpson Church yesterday morning on the occasion of the last quarterly meeting before conference, which meets in Sep-

nation and the life, death and resurrecnation and the Hie, death and resurrection of Christ. Isaiah, in his wonderful and marvelous vision, saw this God man and the revelation of this divine Christ, as my Savior, my God, and, greater still, my Redeemer. The philosophy of Plate and Saveta ophy of Plato and Socrates was nothosophy of Plato and Socrates was nothing compared with the philosophy of this man Christ Jesus. The natural endowments and attributes of this man are not mentioned in the text. It was a spiritual character and nature. The spirit of the Lord was upon Him. It was that Spirit and power that was with Him and sustained Him in that eventful period of His life, death and resurrection. His mind was the master mind, always ready to answer all queswith Him and sustained Him in that eventful period of His life, death and resurrection. His mind was the master mind, always ready to answer all questions put to Him by tearned dectors, and lawyers. Being of that deep and spiritual nature they were amazed and ceased asking questions, always refusing to give attention to anything not in accord with His spiritual work. The speaker carried the thought to his hearers that the mission of Christ was to redeem man and to make dark and cloudy days bright and glorious.

hearers that the mission of Christ was to redeem man and to make dark and cloudy days bright and glorious.

At the conclusion of the sermon the pastor requested all to sing "All hail the power of Jesus's name." According to the usage of the elder an old-fashioned love-feast was announced; many partook of the bread and water and testified to the new springal maniand testified to the new spiritual mani-festations in their own hearts.

Ninety-seven persons of various ages sat down to another of the Union's subsat down to another of the Union's substantial free breakfasts, which was served by the willing hands of the King's Daughters. That those who partook of it were pleased is a matter beyond a doubt—a fact which was appreciated as much by the donors as by the recipients. After the food for the body had been thoroughly indulged in, Rev. O. B. You get value for the money you pay out. Another better article at \$1,00, thirty two fine tucks made out of a splendid article of Black Sateen. If it is not worth \$2.00 it is not worth a cent. You may bring them back and you may have 10 per cent. more than you paid for them. This shows they are good value. We have confidence in them and you should. Another item worth your while to remember. Closing out all Shoes at cost to double the size of our Mammoth Cloak Department. Factory cost—that means a great, big saving to you. This will be the last season for selling Shoes. Watch the growth of this house. It will be an interesting study. Last week over 80 per cent. of an increase. Travel the coast from San Diego to Puget Sound and you will never see the equal. It is the greatest growth ever made by a dry goods house in this city. Any article you buy if not perfectly satisfactory may be returned and the money will be refunded. Squarest la ce to trade.

6520 ACRES

Offered by the Southern California Land Company, 280 North Main Street, adjoining First National Bank.

1630 Shares at \$100 Each,

In Instailments of \$5 00 per Month Without Interest. Not a Land Distribution, but An Investment of Money! Each share will earn 5 per cent. per month on each \$100 for five years, and has the best real estate security.

Sixteen hundred and thirty shares at \$100 each will buy the Fowler Ranch of \$520 acre with the present improvements and the prospective improvements to be made by the present owners at a cost to them of \$500,00. This splendid property is situated on the border line of Tulare and Kern counties, four miles west of the Valley Road of the Southern Pacific Raliroud, and four miles north of the branch line to the oil wells and twelve miles west of the present line to San Francisco. A survey of the Santa Fe line has been made through the western portion of this tract.

Prospectus.

We are soliciting subscriptions for shares in an incorporation to be organized for the purpose of buying from the present owners the Fowler Runch, containing 650 acres, situate on the border line of Tulare and Kern counties, for 850 per acre, with its present improvements and with 450,000 of improvements to be made by the owners and included in the price of 825 per acre, as stated. This is not a land distribution, but an investment of money, with return of money and profits, by dividing the tract into 40 acres subdivis-ons, and after the improvements are made, selling at a future period at \$100 cent, to be paid for in 50 monthly installments with ut interest. On the sixth payment, the subscribers will incorporate, will elect their officers, and the trustee they may appoint will receive a deed for 6500 acres, in excrow, clear of all incumbrances, with the certificate of title attached of the Abstract and Title Insurance Company of Los Angeles, to be delivered to the corporation when the purchase money is paid. The \$30,000 proposed improvements guaranteed by a deposit in bank of that amount, to be paid out to the contractors on certified vouch era at they progress with the work.

Description of the Property.

The land is a rich, black loam, and is known as the Fowler Ranch. It was purchased many years ago by the late senator Tom Fowler of Tulare, when he had the opportunity of obtaining the cream of Tulare and Rern counties. It is in the center of the artesian fruit and affair a belt: has upon it now a sample artesian well flowing \$600,000 gallons, and is in the immediate vicinity of the largest flowing wells in the State.

The Present Price and What the Investment Will Pay, The low rate of the purchase, \$25 per acre, with all the present and the projected im-ovements herein recited, made and paid for by the present owners, at a cost of \$30,000, tables us to guarantee at the lowestrate of sale in the future, say \$400 per acre within e years, an interest of 5 per cent a month on each share of \$100 from the date of sub-ription.

fi e years, an interest of a per cent a mount on take state of the present flowing well, this tract has one section already fenced, a colony house, the present flowing well, large reservoir, etc. The improvements to be made by the present owners will consist of an irrigating canal of 12 miles, six more artesian wells as feeders, survey and division into 40-are tracts, survey and division into 40-are tracts, survey and laying out of the town of Colonna, broad avenues through the entire property planted with trees, etc. etc.

The fall of the land is sufficient for drainage and admirably adapted for the conveyance of water by canal, as there is nothing to obstruct its course. How the 5 per cent. per Month on Each \$100 is to be Earned for the Five Years.

Many well-known citizens thoroughly versed in the capabilities of lands in Southern California double the estimate that we here set forth of 500 per acre within five years, and assert that at the end of that time this splendid body of land, improved as proposed, with water conveyed to each tract, will command readily and quickly \$200 per acre. But we place it, at the low flaure named, \$100 per acre, and any larger amount that it may be soid for will increase the percentage which we claim it will earn at our flaures. Mirrors

\$652,000 00

Sales of 880 town lots of one-quarter acre each...... 44,000 00 8674,000 00 This would leave a surplus, of \$21,000 after paying the interest of 5 per cent. per month.

This surplus would meet all expenses for the full term; salary of superintendent, taxes, expenses attending sales and any extra improvements that the trusters might deem Placed Before the Public for Investment.

The Southern California Land Company of Los Angeles now places this tract before the public and strongly recommends it for the investment of large or of small amounts. This company has conducted in the past seven years many large successful land deals in Los Angeles. Its record is without reproach, and its references include the leading citizens of Southern California. Its clients have numbered hundreds of investors in the Childs' tract. Urmston tract. City Center tract, etc. Its dealings have amounted to hundreds of thousands of dollars and it stands today one of the most popular firms in this section of the state.

An Interest of Five per cent. per Month Must Arrest Attention. An interest of Five per cent, per month must arrest Areas and An investment with perfect security and carning 5 per cent. per month on each \$100 share for a term of five years from the date of the first payment of \$5 mast arrest the attention of every one. It will also be borned in mind that should the stockholder elect to sell at \$100 an acre within, say two years and a half, half of the time that we here propose, their investment will net them 10 per cent. per month for that period.

Miss Cahill and Miss McKinley form a remarkably strong team and cover their court with marvelous skill. The Philadelphia pair proved to be no mean opponents, but they were clearly overmatched from the beginning. The first set was won by the New Yorkers very easily, their opponents hitting many balls out of court or into the net. The second set was much closer and was pluckily contested by the Philadelphia team until the last stroke was played. Mrs. Harris and Miss Williams deserve much credit and received many congratulations upon their excellent show-

Following the example of young Fair, Adolph Spreckels, son of Claus Speckels, the sugar king, has gone into' the business of breeding high-class thoroughbreds. His first deal was the purchase for \$15,000 of the recently imported stallion Idalium from R. B. Delopse. Idalium is a full brother of the famous Sir Modred and Cheviot, and in general appearance is bigger and better looking than his distinguished relatives. Sir Modred is owned by the Haggin farm and is not for sale at any price, and \$50,000 has been recently refused. Idalium is a royally bred horse, being by Traducer, dam Idalia, by Coronet, from a family that has won more noted races than any other on the Australian continent. Spreckels intends to go into the breeding of thoroughbreds on a fairly extensive scale. His efforts heretofore have been limited to trotheretofore have been limited to trot-

AN EXPLANATION AND ANSWER.

WHAT IS WINTERILLA?

Why, it is a pleasant and effective remedy for the positive cure of Chapped Hands, Poison Oak, Salt Rheum, Eczema, Sun Burn, Tan; positively removes Freckles, and is one of the grandest luxuries for gentlemen after shaving. This is an exquisite article propared with the greatest care by scientific experts. Its component parts are perfectly harmless, and the ladies toilet is not complete without it. One trial will convince the most skeptical that what we say of WINTERILLA is true. For sale by all druggists in 25c and 50c bottles.

DR. WONG:

"Ingeniously locating diseases through the pulse and excellent remedies are great blessings to the world."

The above are two fac similes of many REWARDS OF MERIT or DIPLOMAS of PROFES. SIONAL SKILL which have from time to time been awarded to the CELEBRATED CHINESE PHYSICIAN, DR. WONG, for his superior medical abilities and curative powers.

It has long been customary among the Chinese people when one becomes sick and when repeated attempts to cure him have failed, and he is perhaps given up to die, if, after having been taken to an eminent physician, he be cured of his disease—the cured, too in addition to the regular fee for professional services rendered, makes the physician a present as a token of gratitude for his restoration to health and the prolongation of his life. This present consists usually of a broad plank, presenting much the appearance of a sign-board, filled with characters entirely meaningless to the average baglish scholar, but full of meaning to the successful physician and his friends. It is a motto which highly compliments the physician for his great skill in effecting a cure of the disease which once afflicted the donor.

This Will Be a Quiet Fourth in Town.

Many People Spend Sunday on the Mountains.

Rev. Mr. Phelps Calls Attention to Church Indebtedness.

The Question of Sprinkling a Much-trav eled Thoroughfare—A Fire That Was Put Out-Brevitles and Personals.

Fourth of July in some public manner Today, however, will prove an exception Today, however, will prove an exception.
At 7 o'clock this morning Co. B will have a street parade. Besides this there will likely be nothing out of the ordinary to reord. Indeed the day in town will probably be one of unusual quiet. The banks and many of the stores will be closed, and at least half the populace will journey elsewhere to have a good time, and the opportunities will not be lackings. The celebration in Los Angeles in the morning will attract many and the baseball match in the afternoon between the Los Angeles and San José teams will attract more. Many of the pleasure-seekers left Saturday and yesterday for the mountains or seashore, where they will spend the day in the enjoyment of rest and recreation.

The camps on Mt. Wilson are filled with guests; Catalina has an innusually large number of holiday visitors, and Long Beach, Redondo and Santa Monica are crowded. Those who have decided not to go away will probably pass an equally enjoyable day by spending it quietly at home, so that if Pasadena has no celebration the people will have a good time just the same.

wilson over the new trail this season will see many things that they didn't see last season. The trail itself has been improved in more ways than one. Diminutive but conspicuous mile posts have been located at proper intervals. These serve as a pastime to the traveler, for they tell him how far he has yet to go and by consulting his timepiece he can tell exactly how fast he is going and how nearly he is piloting his mule to schedule time. At the upper-end a force of workmen are engaged in widening the trail to a wagon road.

The camp itself is hardly recognizable. The improvements are so general that no adequate description of them can be made. Any one who has visited the camp during previous seasons must call again to appreciate what has been done.

Saurday and yesterday were busy days at the camp. There was a large indux of visitors, but all were satisfactorily accommodated, and the opinion was unanimously expressed that it was the best possible place in this region to spend the Fourth comfortably and pleasantly. The tents were decorated with flags, giving quite a parriotic appearance to the camp. These evening there will be a pyrotechnic display, but the fireworks will be of a mild and gentle order and will not include rôckets, for the memory of last year's mountain fire is still fresh in the minds of all who assisted in putting it out.

WHERE MONEY IS NEEDED. WHERE MONEY IS NEEDED.

But County Treasurer Truman Reeves says he is willing to make the payments upon the decision of the District Attorney, and all of his bondsmen except two—H. L. Drew and Louis Jacobs of this city—have consented to his making the payments. Should they not give their consent they will be asked to remove their pames from the bonds, and the funds deposited in their banks will be withdrawn and placed in the keeping of the bondsmen who remain upon the bonds. Some of the local attorneys do not agree with the decision of the District Attorney, and one of them has stated publicly that the decision is illegal, and that the matter cannot be settled except by the Legislature. But as there are men ready to guarantee the Treasurer against loss by this procedure, he feels safe in taking the proposed step. But it is evident from the agitation going on and the restlessness of those concerned, and of the citizens generally, that the end is not yet.

The motor between here and Riverside is The motor between here and Riverside is now running on a go-as-you-please plan. It is supposed to make connections with the Southern Pacific trains at Colton. Yesterday morning arrangements for carrying passengers to the early Coast train were not made until the last moment, and people had no opportunity for learning what was to be done. The Santa F6 got the benefit. Yesterday afternoon passengers boarded the train seheduled to leave for Colton at 6:10. The time for departing came and went. The train did not move, Getting nervous as to what was up the passengers began to alight and make inquiry as to the cause of the delay, and it was learned that the train would not leave until 7:10, one hour after schedule time. No reason was given and no notice had been posted. The regular scheduled 7:23 train did not trun, so a number of passengers did not get away from the city. Larabee, planist, was a surprise to the audience and its members were compelled to auswer to the hearty encore given them after each appearance

The Euterpean Quartette Club of Los Angeles, consisting of Messrs. J. P. Dupuy. F. E. Nay, H. S. Williams and F. W. Wallace, delighted the audience from the time they sounded their first note in the evening. Each is endowed with a good voice, especially adapted to the part he takes, and all are good soloists. Their voices blend well, the phrasing being clear and precise and the shading sensible and free from exaggeration. They succeeded in winning a perfect ovation, the applause at times being almost deafening.

Our own Mrs. Rice sang herself into the hearts of the audience in her usual interesting way. Her voice was clear and sweet, and as she sang her whole soul seemed to go out into the selection she was rendering. go out into the selection she was rendering. It matters not how often Mrs. Rice appears before a home audience, she is always encored.

That portion of the programme in which the audience looked forward to with the greater interest was the appearance of Modjeska. As she stepped from behind the scenes, accompanied by J. S. Rice of Tustin, the audience greeted her with loud and prolonged applause. The madame, after bowing a recognition of her reception, stated that during her moments of leisure as she sat beneath the spreading oaks at Arden, in Santiago Cahon: absorbed in thought, after having finished reading; a book in which Rosalind's character had asserted itself, she thought why could not she, in her humble way, say or write something of the most beautiful character of which it had ever been her pleasure to know. Acting upon this thought she wrote of the character of one whose aims were high and whose actions were above reproach. As for her pen picture of the beautiful character of this person she would give it to the kind people of Santa Ana as she would give them a bouquet of wild dowers from her mountain home, hoping it would please them, if nothing more. For full thirty minutes a pin could have been heard to drop upon the floor so attentive was the audience as the madame, in a full rich voice and in words of eloquence, portrayed a beautiful character. At the conclusion of her reading she was besieged by the little flower girls with huge bouquets of the most beautiful flowers, and after her arms were filled with blooming flagrance she bowed herself behind the scenes amid long and floud applause.

The enfertainment was a thorough success in every particular save one, and that was the unfortunate absence of Robert Payton Carter whose name appeared on the programme for two or more choice selections. Mr. Carter arriving informing-him that his mother from Engiand would that evening arrive in Los Angeles, took him back to Los Angeles on the next train.

Bearing upon the wail of the "unterrilled" over the correct report of the recent Democratic demonstration that appeared in the Orange county column of The Times, the Orange Post says: "The Blade dosen't like the report of The Times correspondent. As it is not much of a success itself in the non-partisan line it should be a little modest about trying to have others follow its example."

Pomona who wants work can find it. One firm will employ over 300 hands in caring for the apricot crop, and the other fruit-drying concerns will need probably 200 more. The season has opened and will be at its height in a few days. The fruit-growers are wearing a very broad smile, for with the short orange crop and the poor prices offered for apricots they had begun to think this would be a hard year. But good prices make a wonderful change.

Towns that expect to have probibition ordinances might follow the one drawn up by the City Attorney and numbered 89. It has been passed upon by all the courts and strictly inforced inside of six months after its passage. It can be truthfully said there is not a saloon in Pomona.

The Fourth is upon us, and the city will begin early, at 7:30, when the Ninth Regiment band will parade the streets, playing national airs. At 9:30 the procession will form on Second street, corner of Parcells, and after parading the principal streets will go to the city park. There will then be music, by the band, an opening prayer by Rev. Mr. Craig, remarks by President W. A. Bell, Esq., the Declaration of Independence, recited by Miss Loud, some first-class chorus singing and an old-fashioned basket picnic. In the afternoon a football match and then return to the city and see the sports on Second street. An open-air concert will be held in the evening. In fact the residents expect to put in the whole of the Fourth, and their enthusiasm may carry them well on into the 5th.

George Mullally was brought back to the city last night and lodged in jail.

The discourse of Rev. A. J. Wells at the Unitarian Hall vesterday morning was a very masterly address and was listened to by the audience with rapt attention. His subject was, 'The present judgment, taking the position that the great judgment day is already upon us and not a myth of the future.

The Ancient Rhymers will be given at the operahouse Thursday evening. Sixty children will appear in gorgeous costume, and Mrs. Taylor has worked hard and long to get them in perfect training. It is given under the auspices of the Band of Hope.

There is not a citizen in Pomona who is not heartily glad that there will be no cannonading, nor bombs bursted, nor anvils shot this time. It is very nice fun for some, but when there are sick lying at death's door, and every shot causes the watcher's heart to sink within him, because of the pain caused the sick one, like there has been in Pomona, the fun ought to stop. It doesn't show any bravery.

A telegram reached the city late last evening announcing the sudden death at Enclinitias of C. R. Dally, who left Pomona only a tew weeks ago. He had been a resident of this city for several years and assisted at Hardy's photograph gallery. The body will be shipped here today.

RAILROAD AFFAIRS.

A Santa Fe Train Derailed at Inglewood.

A Defective Switch Almost Caused a Serious Accident.

How a General Manager Catechised a Section Boss.

Objecting to the Southern Pacific Time Table-You Must Look Out for the Locomotive-Local

The passenger train which left Los Angeles at 5:25 last evening for Redondo and Santa Monica, over the Southern California Company's line, had a very close call at Ingelwood, the junction point of the two seashore branches. It is the custom to divide the down train at this point, certain coaches going on through to Redondo and others being switched over to the Santa Monica track and attached to a train in waiting. It appears that the train from Los Angeles approached the junction of the "Y" at its usual moderated speed to take a position for the cutting out of the Santa Monica cars, and in crossing the switch it became so disarranged as to permit the engine and first car to run upon one track and the second truck of the following car to start upon the diverging one. This was, start upon the diverging one. This was disastrous, as could be expected, and resulted in derailing the engine and baggage car. The jar of the sudden stop caused a man named Ullney of Downey to plunge headlong out of the door of the baggage car into the ditch beside the road, sustaining thereby numerous cuts and bruises not necessarily serious. He was brought to this city and placed in care of Dr. Morrison, the company's surgeon, at the Sisters' Hospital. Other passengers were jolted somewhat and considerably frightened, omewhat and considerably frightened, but were not hurt. By 9 p.m. the track was all cleared. It is not known what caused the switch to throw at that moment. The fact that trains always run at slow speed by the junction prevented what might have been a far more serious accident. more serious accident.

AN ALMOST FORGOTTEN INVENTOR. Joseph A. Maybin of Santa Monica writes to THE TIMES the following bit

of interesting railroad history: "A paragraph in today's Times states that W. H. Shulty of Wilmington, Del., was the first inventor by which an enwas the first inventor by which an engine was able to draw a train of cars up grade, or words to that effect. I write you to correct the name, which should be William H. Shultz, instead of as published; perhaps a typographical error. I know the gentleman very well, and had it from his own lips and was further informed by him that he never realized anything pecuniary from his invention. He was one of the party of Harrison & Eastwick, who had the contract to build the railroad in Russia contract to build the railroad in Russia about the time of the Crimean War, by which he made quite a snug little for-tune. If he still lives he is now about 85 years of age, and when I last saw him about four years ago thought nothing of walking ten miles and was as healthy and muscular as most men of 40. I write this that his name may be properly spelled and justice extended where it belongs, as the invention was one of the most important additions to one of the most important additions to

The producers have, in fact, been generous to outside middlemen at the expense of the domestic enterprises which have given them the prosperity they enjoy, and have themselves reaped nothing from it. According to the Railway Age, out of the 9000 miles of railroad in Texas, not more than a few hundred miles of one single company have ever paid dividends on stock, and only two of the companies pay the interest on the bonds. citizens of Santa Barbara and that section of the country are protesting loudly over the new passenger train schedule now in force on the Southern Pacific. The first train out of Los Angeles for Santa Barbara leaves this city at 8:20 a.m., the only other leaving at 2 p.m. But one train a day arrives from Santa Barbara, at 9:05 p.m. The Santa Barbarians protest, strongly against making their mail from the south an hour later in arriving, asit was late enough under the old arrangement. THE THEOSOPHISTS.

A Largely Attended Meeting of the So-clety Last Evening. A large audience assembled at the theosophical meeting in St. Vincent's

Hall last night. The remarks of the speaker, A. Clark were received with enthusiasm.

At the close of his lecture he said "Such an attempt as the present The osophical Society has been made dur-ing the last quarter of many past cening the last quarter of many past centuries. If the working members of the Theosophical Society can keep themselves from being dogmatic, can become selfless, earnest and devoted to the general good and gain knowledge and wisdom enough—then the society will gradually leaven and permeate the masses of thinking and intelligent people with its large-minded and noble ideas of religion, duty and philanthropy. Slowly but surely it will burst asunder the iron fetters of creeds and dogmas, of social and other prejudices and help to open the way for the practical realization of that glorious vision of Victor Hugo, in which he says: 'In the twentieth century war will be dead, dogma will be dead, and royalty will be dead; but man will live, for all there will be one country, and that country the whole earth, for all there will be one hope, and that hope the whole one hope, and that hope the whole heaven."

LED A DUAL LIFE.

A Man Who Kept Up Two Establishments.

Wife and Family on the East Side While He Maintained Another Family on This Side of the River.

Two years ago there lived at No. 540 South Spring street a Mr. and Mrs. Allen and two bright little boys, The family came here from Little Rock, Ark., and, notwithstanding the fact that the Allens lived in rented rooms, they seemed to be well provided with both wealth and a surplus of time, for the husband spent most of his sleeping and waking hours with the beautiful woman, whom he called wife, and was, to all appearances, devoted to both mother

That the man was living a double life no one about the house had the slight-est suspicion, but such was the case, as subsequent developments proved be-yond a doubt. How he managed to conceal his identity for almost a year is one of the mysteries that will never be explained, but he did, notwithstanding the fact that he had a wife and family living in good style on the East Side, and his wife is very rich and highly onnected. Not only that, but his wife is very rich and furnished him with large sums of money, with which he not only kept up his Spring street family, under an assumed name, but made him-

under an assumed name, but made num-self very popular with business men and men about town. He had a large acquaintance all over the city and how he managed to run two families under different names and steer clear of the gossips is a mystery, but he managed to do so, and he was so successful, that he is yet master of the situation so far as the public and his legitimate wife are concerned.

Whether he has reformed is not known, but the Little Rock wife and known, but the Little Rock wife and her two children have disappeared and she is believed to be back at home with the orginal Allen. How long she had been in the city when the East Side man stepped into her Southern husband's shoes and adopted his name is not known. They called together at the Spring street lodging-house and engaged rooms in the name of Mr. and Mrs. Allen, and they were so well-behaved and seemed to be such nice people that the landlady never suspeople that the landlady never sus-pected anything wrong until some months later, when they took their de-

parture.

Mrs. Allen was behind in her rent and when the landlady pushed her the cat jumped out of the bag and the landlady knew that Mr. Allen was Mr. Blank of the East Side. She called on him and he promptly squared matters and Mrs. Allen disappeared. This is the first case on record where

This is the first case on record where the married lover has assumed his mis-tress' name and lived under the very nose of his legal wife. Finally the mis-tress was acquainted with her husband's loings and the usual separation took the parties most concerned were made to understand just how things stood when the usual kiss-and-make-up scene took place, and the East Side couple are

once more living together as happy as they can be under the circumstances. Several blackmailing schemes have been started by male and female blackmailers who manage to exist in this city, but the East Side lady refused to become a victim, and so far as is known at present all is quiet and loving be tween the husband and wife.

Special Clean-up Sale of Horses

On Premises Rancho Potrero Grande, Property of Richard Garvey. Sale at Public Auction on WEDNESDAY, JULY 6, 1892,

To the Public: I desire to say that I am offering my finely bred horses, mares and colts by Lexington, he by the illustrious Lexington, solely because I am devoting all my attention to placing my lands under a perfect system of irrigation. My contract calls for the work to be completed in a short time, and my horse stock must be sold. For directions to my ranch see circulars, to be had at 0. K. Stables, 248 South Min street, from my salesman.

# WINS!

It is neither luck nor chance that brings to our house the large and growing trade that we enjoy, but it is our systematic efforts to place before our trade only the best of wares at prices that cannot be matched nor equalled elsewhere. We are the only house in our line that is constantly represented by one of the firm at New York. Thinking patrons will readily see and understand the benefit of our being in the market and doing our own selecting and buying. It is quite different from deputizing a stranger to do your work. It is very such different, inasmuch as a principal will buy a line of merchandise at an inducement price, instantly at a second's reflection, whereas, a hired buyer has no option but fills orders in their regular rotation only. These inducement prices occur, yes they occur daily, which is the simple secret why our stock abounds with far more undervalues for buyers to feast upon than does the

# Entire Town All Told

Day in, day out, we are bettering the class of our belongings; we are offering you higher class materials; we are offering them daily, yet only at our well-known proper prices. This is shown more especially in our Dress Goods Department, where, as a test, you'll see our 50c Dress Goods, worth 75c elsewhere, and our 75c Dress Goods worth \$1.00 elsewhere. Samples are given to doubting buyers, for it is our desire, not alone to sell, but to make a constant customer of every one we sell to. We are not satisfied to have your trade one time, but we want it always; in fact, there is nothing gained by a house selling a buyer but once. What we aim for is to count you amongst our countless constant customers,
